CHAUTAUQUA PROGRAM FOR NEWPORT

Mrs. Winifred Cook, who was in Newport last week advance agent for the Chautauqua has presented the program which bids fair to be a most attractive one. "The world moves and those who do not move with it will be left behind." Scientists tell us modern science is on the threshold of adventure. Educators tell us of imminent changes in the educational world. Business men tell, business conditions are rapidly changing. Students of government tell us of inefficiency and extravagance in the national, state and city government. Our president has brought about many economic measures but in order for them to become effective they must be backed by strong public sentiment.

The Chautauqua will bring this year an authority on science, one on national affairs, another on business and education, and still another on international affairs. All of them, meet who will point the way to progress. Now is the time as never before for the open flexible mind.

The program of the Chautauqua Aug. 21-26, reads as follows:

The youngest of a family of 12 children of which he was the last surviving one. His nephew, Earl Jordan, of Hardwick being the only one now to carry the name of Jordan. Hiram Jordan was a kind neighbor and friend, a good citizen and will be greatly missed not only by his immediate family but by a large circle of friends whom he had won by his kind-hearted and cordial greetings. Hiram was united in marriage to Lucy Chaffee of Albany, who survives him. Three children came to bless this union, one of whom died young and the others, Mrs. George Young and Mrs. Leonard Bannister, now living in Greensboro a comfort to the sorrowing mother. The funeral was largely attended at his late home Sunday afternoon, Rev. E. R. Gordon officiating and the interment was in the family lot at East Craftsbury cemetery.

LYNDON INSTITUTE

New School Building Nearing Completion

Work is progressing satisfactorily on the new Lyndon Institute building. The roof of the building is now on and the work of plastering has commenced. The heating plant is nearly finished and by next Monday will be ready for use. A part of the building will be ready for the opening of the fall term, Sept. 12, and the work of the new school year will begin in this splendid new building, as predicted soon after the fire that destroyed the old building last January. The new building, modern in every way in its construction, has many advantages over the old building and will have an equipment far superior to the one destroyed by fire. The grounds about the building and the campus are being graded and made much better than they have been. The students who return next fall, and the new students who come, will find they have many advantages and conveniences that former Institute students have not enjoyed, but notwithstanding there is to be no increase in tuition which remains the same as heretofore.
